***Local Dentist Completes
Advanced Training Becoming A
Master Aesthetic Dentist***

For a lot of people, a beautiful white smile can be achieved in a matter of a few weeks instead of years. This can be done through a conservative technique that reshapes the teeth and fits them with porcelain laminates that are metal-free, and look and feel like the real thing. Many people can now improve their smiles without the necessity of braces. These natural looking restorations can create the perfect smile that may be desired by many...instantly!

Local dentist, Dr. Catherine Vetrano has recently completed post-graduate training at the prestigious Las Vegas Institute for Advanced Dental Studies in Nevada. Dr. Vetrano completed the **Comprehensive Aesthetic Reconstruction Program** and studied under the world-renowned Dr. William Dickerson, a Fellow of the American Academy of Cosmetic Dentistry. While at the Institute, Dr. Vetrano underwent intensive training including completing a complex case on a patient under the direction of her instructors. To qualify to complete this advanced level of training, Dr. Vetrano had to complete several other courses as part of her training.

Dr. Vetrano is one of the few dentists from the area that has completed a program that teaches these skills. Dr. Vetrano's commitment to excellence is emphasized by undergoing this training to provide patients with only the best restorations and care possible. By undergoing this training, Dr. Vetrano has achieved the clinical ability that few dentists in the country are even aware exist.
